About Me

Crypto-native growth and content marketer with 5+ years building communities, producing content, and driving ecosystem growth on Solana and beyond. I write the scripts, direct the shoots, appear on camera, and handle distribution across X, Telegram, Discord, YouTube, and Instagram.

I have grown communities from zero, onboarded protocols, managed 400,000+ member platforms, and traded DeFi products firsthand across Kamino, Drift, Jupiter, Perena, and others. I do not just create content about crypto. I live in it.
